

Rommel Jave Casipong

Aspiring Software Developer — AI & GPU Computing Track

rommeljavecasipong8964@acdeducation.com | github.com/casipong8964 | casipong8964.github.io

OBJECTIVE

Third-year BSIT student on the Software Development track, seeking an internship to apply and grow programming, database, and problem-solving skills, with a long-term focus on AI and GPU-accelerated computing.

EDUCATION

Bachelor of Science in Information Technology — Software Development Track

Assumption College of Davao (ACD) | 3rd Year | Expected Graduation: 2028

TECHNICAL SKILLS

Languages	Java, Python, C, SQL, HTML/CSS
Tools & Platforms	Git & GitHub, VS Code, MySQL, Linux (basics)
Currently Developing	Cloud Computing, Cybersecurity, CUDA / GPU Programming

PROJECTS

Docker Infrastructure

PHP, Docker | github.com/casipong8964/-Casipong_DockerCodebase-Docker-infrastructure

Containerized deployment setup used to run a CRUD system and a microservice API together with Docker.

IT302 — Coursework Project

PHP | github.com/casipong8964/IT302-CASIPONG

Repository for IT302 coursework covering programming exercises and a course project.

Casipong System 1 — Main CRUD

PHP | github.com/casipong8964/Casipong_System1-Main-CRUD

Core Create-Read-Update-Delete system serving as the main application layer of a multi-part project.

Casipong System 2 — Microservice API

PHP | github.com/casipong8964/-Casipong_System2-Microservice-API

API layer built to work alongside the main CRUD system, separating concerns into its own service.

CAREER FOCUS

Working toward specialized experience in AI and GPU-accelerated computing, with a long-term goal of contributing to a technology company such as NVIDIA.
